

Earth in danger!

- People seems to not care about the environment so they pollute it. They cut down trees, throw away rubbish and waste water.

Five simple ways to help the planet

1

Don't wash your clothes at 60C.
Save electricity and wash them at 30C.

2

Use only water and soap to clean the floor of your bedroom and your desk.

3

When you help in the kitchen ,use vegetables waste to make compost to make your flowers grow.

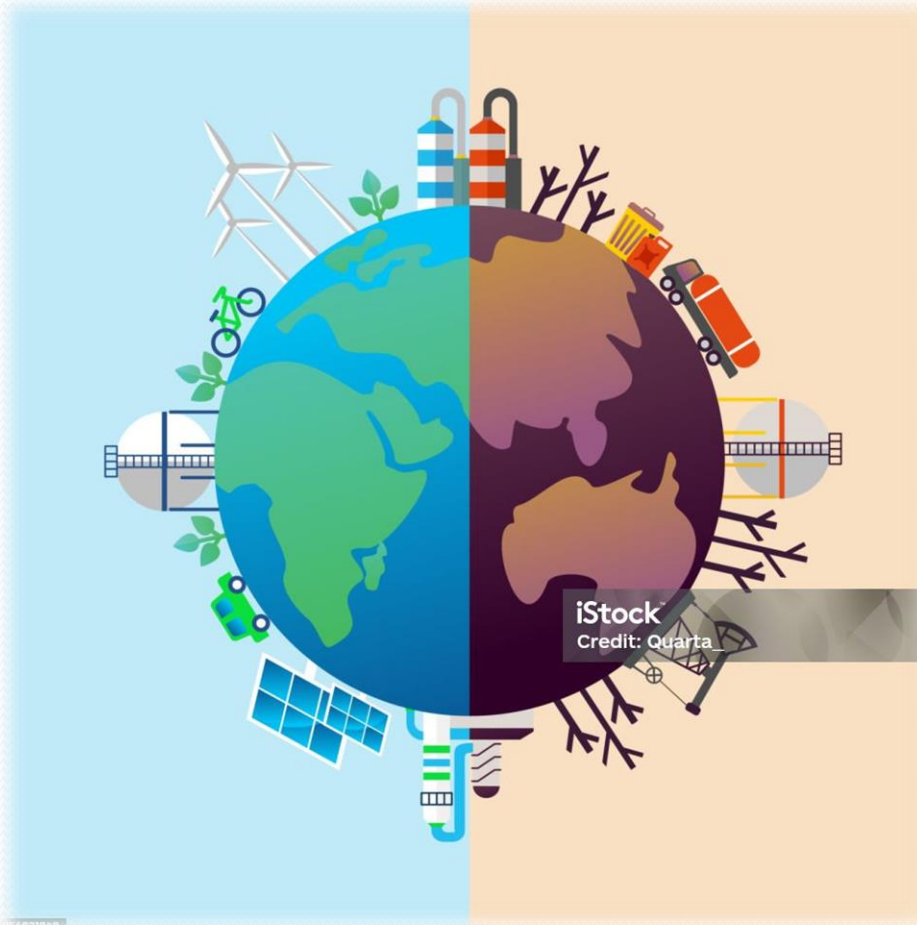

4

Unplug the TV. If you don't , it will still use some electricity.

5

Plant trees in your school garden to keep your school cool.

If we don't stop polluting the air, **the climate will become warmer** and there will be **more deserts**. If we continue to **pollute the sea**, we will kill the animals in it. If we **cut down the forests**, we will **destroy the habitats** of wild animals.

Earth is our home , We must protect it!!!

- Save the forests!
- Throw away rubbish!
- Look after the environment!
- Plant new trees!
- Don't pollute cities and rivers!

***DON'T BE PART OF THE
PROBLEM,
BE PART OF THE
SOLUTION!!!***

THE END
